

Acid Test & Removal

Complete package of acid treatment products

- coil cleaners
- leak detection & monitoring
- recovery machines
- vacuum pumps
- weighing platforms
- acid treatment
- fragrances & odour control
- flame retardants
- tools & accessories

QwikCheck (Rapid acid test)

KEY BENEFITS

Highly effective test for acid – in just 5 seconds

Works for all refrigerants and oils

Safe for all systems

A colour change indicates a pass or fail

QwikShot (Acid removal)

KEY BENEFITS

Leaves no residue or contamination

Superior to acid neutralization

Works with all refrigerants, oils and filter dryers

Convenient packaging eliminates wastage of product

Acid Test & Removal

Complete package of acid treatment products

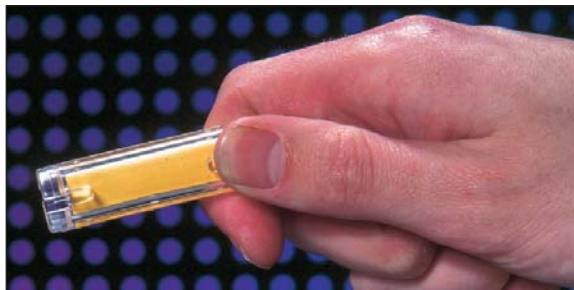

The development of acid in refrigeration and air conditioning systems can severely shorten the life of the compressor and the refrigerant. Modern synthetic lubricants, when exposed to moisture, can cause serious corrosion. Where compressor burnouts occur, the oil becomes extremely acidic. If all the oil is not identified and removed, the increased acid levels will attack the new compressor and cause

another motor burnout.

Test for acid with the compact QwikCheck. It is fast, accurate and inexpensive. NO MESSY OIL SAMPLES. Treat any acid with QwikShot. QwikShot's unique patented design carries unwanted acid into the filter drier where both the acid and the QwikShot are removed without leaving any residue. Use QwikShot to treat one large system or several smaller systems. QwikInjector - A simple tool, QwikInjector

acid treatment

can be used to inject QwikShot directly into the operating system. Acid is a killer in refrigeration systems. Other treatments may neutralise the acid but leave behind salt residues. These can, in some cases be just as corrosive as acids. Only QwikCheck and QwikShot can guarantee a safe acid free system.

FEATURES

QwikCheck:

- No messy oil samples
- Accurate, fast and cheap
- Throwaway design

QwikShot:

- 1 package treats up to a 12 ton unit
- No salt residue
- Will not harm system components
- Can help prevent a system burnout

TECHNICAL INFORMATION

Property	QwikCheck	QwikShot
Application	Acid test kit	Acid removal refrigerant circuit
Soils	N/A	Acid
Dilution (Water:Product)	NO	NO
Contact Period	5 seconds	As necessary
Rinse/Flush Required	N/A	NO
Special Features	Throwaway design. No oil samples	1 package treats up to a 12 ton system
