EnviroCoil

Condenser and Evaporator Cleaner Environmentally Friendly Coil Cleaner

Developed specifically to help you decrease negative impact on the environment, EnviroCoil is a genuinely "green" coil cleaner. Importantly, it offers two ways to protect the earth and its resources.

The first is that, unlike most coil cleaners, it is environmentally friendly, containing only biodegradable surfactants.

The second is the reduction in the consumption of fossil fuels. Dirty coils can increase power

consumption by as much as 30%. A single treatment with EnviroCoil cleans coils quickly and effectively - removing the dirt without damaging the equipment. This improves efficiency and reduces energy bills.

FEATURES

Odourless

Non-flammable
